Bruce A. Mah wrote:

I remember Dimitry Andric reported the same problem on -stable on 30 Dec, and after he reverted rev.1.48.2.16 it worked fine again. Do you have the symptom even on 6.2-RELEASE? Since RELENG_6_2_0_RELEASE did not have the change, I thought there was no problem.

...

On my 6-STABLE system (which appears to be working fine), I still have the change from 1.48.2.16, I only backed out .15 and .14. I didn't try my diff on the 6.2-RC2 and 6.2-RELEASE machines yet.

Hmmm...I was looking for that bug report before, but I couldn't find it. It's not clear to me how 1.48.2.16 is involved...hmmm...

I originally reported this here:

<http://lists.freebsd.org/pipermail/freebsd-stable/2006-December/031809.html>

and later I found out it was caused by commit 1.48.2.16:

<http://lists.freebsd.org/pipermail/freebsd-stable/2006-December/031853.html>

I'll shoot in a regular PR later tonight...
