Hi folks,

FreeBSD-6.2-amd64

Onboard NIC

Motherboard ASUS M2N-E

[url]http://www.excaliberpc.com/ASUS_M2N-E_nForce570_Ultra_Motherboard/M2N-E/partinfo-id-567211.html/

Fixed IP address

IP address of server (LAN) - 192.168.0.10

Just finished "standard installation" to install the captioned OS. On "Choose Distributions" window selected "All system sources, binaries and X Window System"

On "Network interface information required" window, no NIC was found;

[url]http://www.freebsd.org/doc/en_US.ISO8859-1/books/handbook/install-post.html/

so "PLIP0" was selected.

Everything went through w/o problem. On reboote "xterm" was started with evoking "startx. But unable to connect outside World.

The onboard NIC seems not detected.

```
# ifconfig[code]plip0:
```

```
flags=108851<UP,POINTOPOINT,RUNNING,SIMPLEX,MULTICAST,NEEDSGIANT> mtu 1500
```

```
lo0: flags=8049<UP,LOOPBACK,RUNNING,MULTICAST> mtu 16384
```

```
inet6 fe80::1%lo0 prefixlen 64 scopeid 0x2
```

```
inet6 :: prefixlen 128
```

```
inet 127.0.0.1 netmask 0xff000000[/code]
```

```
# ping 192.168.0.10[code]PING 192.168.0.10(192.168.0.10): 56 data bytes
```

```
ping: sendto: No route to host
```

```
ping: sendto: No route to host
```

```
.....[/code]
```

Please advise how to fix the problem. TIA

B.R.

satimis
