A1, 24/11/2007 2 17:28 +0100, Andrea Venturoli ?8H5B:

After portupgrading two samba servers, I cannot connect any more to them through mount\_smbfs. Connecting from Windows works fine.

Am I the only one who is experiencng this problem?

Did you portupgrade with CVE patches?

See: `grep CVE /usr/ports/net/samba3/distinfo`

If you did, that's ok :)...

<http://www.freebsd.org/cgi/query-pr.cgi?pr=118224>

Samba bugzilla page, mentioned in PR, has a patch.
