Per earlier e-mail, I've created a page to track the various on-going projects:

<http://wiki.freebsd.org/TCPProjects8>

Rui has already kindly added the TCP ECN work to the page.

As I know, we have a single swi:net thread in the kernel yet. Are there any plans to make several such threads? If yes, this activity isn't mentioned in wiki.

There are 2 ideas:

1. per-core thread
2. per-interface thread

I like the second more.

Regards,
Dmitriy Marchenko.
