What type of mouse is it & what protocol are you using in
/etc/X11/XF86Config-4 ?

> *Ok. I'm running 4.8 release. How should I update my*

Here's my cvsupfile that works fine:

```
### SNIP ###
```

```
*default host=cvsup.de.FreeBSD.org
```

```
*default base=/usr
```

```
*default prefix=/usr
```

```
*default release=cvs
```

```
*default tag=RELENG_4
```

```
*default delete use-rel-suffix
```

```
src-all
```

```
*default tag=.
```

```
ports-all
```

```
doc-all
```

```
### SNIP ###
```

Have a look at

http://www.freebsd.org/doc/en_US.ISO8859-1/books/handbook/cvsup.html

and modify the bottom lines of the above cvsupfile to get
only the things you really need.
