To: freebsd-newbies@freebsd.org

I am trying to upgrade Perl from version 5.005_03 to 5.8 on a 4.8-RELEASE FreeBSD VPS (virtual private server).

I did a 'pkg_add perl-5.8.0_7.tgz' but I then removed it because I was getting this error:

```
/usr/libexec/ld-elf.so.1: /usr/local/bin/perl: Undefined symbol
"nl_langinfo"
```

I then decided to download the source and compile it myself, but some of the tests fail:

Failed Test Stat Wstat Total Fail Failed List of Failed

```
-----
.../ext/IPC/SysV/ipcsysv.t          78 19968    16   16 100.00%  1-16
.../ext/IPC/SysV/t/msg.t           78 19968     9    9 100.00%  1-9
.../ext/IPC/SysV/t/sem.t           78 19968    10   10 100.00%  1-10
.../lib/IPC/SysV.t                 78 19968    16   16 100.00%  1-16
.../lib/Net/Ping/t/110_icmp_inst.t 255 65280     2    1  50.00%  2
45 tests and 414 subtests skipped.
Failed 5/712 test scripts, 99.30% okay. 52/68476 subtests failed, 99.92%
okay.
```

=====

These are the failure messages:

```
t/op/taint.....# shmget failed: Function not
implemented
# msgget failed
ok
ext/IPC/SysV/ipcsysv.....msgget failed: Function not
implemented
FAILED at test 1
ext/IPC/SysV/t/msg.....msgget: 78 Function not implemented
FAILED at test 1
ext/IPC/SysV/t/sem.....semget: 78 Function not implemented
FAILED at test 1
lib/IPC/SysV.....msgget failed: Function not
implemented
FAILED at test 1
```

freebsd-newbies: Perl 5.8 – make test problem (shmget. msgget)

```
lib/Net/Ping/t/110_icmp_inst.....icmp socket error - Operation not
permitted at ../lib/Net/Ping/t/110_icmp_inst.t line 27
FAILED at test 2
```

I also tried with perl 5.6.1, but make test fails too.
Please help me.

Regards,
