To: freebsd-newbies@freebsd.org

I do have some problems with my ports/portupgrade and I donw know what!  
I have freebsd 5.3, no problems with doing CVS (have latest cvs), I will  
attach my pkg\_info at the end of mail too.

Problem1:

```
doing portupgrade doesnt work(I have tried on several ports)
su-2.05b# portupgrade snort-2.3.1
[Updating the pkgdb <format:bdb1_btree> in /var/db/pkg ... - 121
packages found (-5 +13) (...).ruby18 in free(): error: page is already free
Abort trap (core dumped)
su-2.05b#
```

Problem2:

searching for ports doesnt work

```
su-2.05b# cd /usr/ports
su-2.05b# make search name="foo"
Generating INDEX-5 - please wait..
(stalling at last row forever)
```

my pkg\_info:

```
=====
apache-ant-1.6.2 Java- and XML-based build tool, conceptually similar
to mak
aspell-0.60_2 Spelling checker with better suggestion logic than
ispell
atk-1.8.0 A GNOME accessibility toolkit (ATK)
autoconf-2.13.000227_5 Automatically configure source code on many Un*x
platforms
autoconf-2.53_3 Automatically configure source code on many Un*x
platforms
autoconf-2.59_2 Automatically configure source code on many Un*x
platforms
automake-1.4.6_1 GNU Standards-compliant Makefile generator (legacy
version
```
