To: freebsd-newbies@freebsd.org

hello

I have 5.4-PRERELEASE on a i386 and want to use the scanner of my CX5200 on it. There is a post about this on the hackers list written by a man Who have this scanner working with a simple patch that isn't ok on my kernel (<http://lists.freebsd.org/pipermail/freebsd-hackers/2003-September/003272.html>).

which way have I to take ?
