Hello fellow newbies and hacks. I am 2/3 up with my first freebsd system (v5.3) but it has been a tough 3 weeks.

I am ready to call it quits.

I need help, and I am willing to pay a modest consultant fee to the hack that can help me get over my problems with:

usbd
apsfilter or cups
wine
packages (without an internet connection)

thanks.....don

ddlawrence@excite.com

ps disregard previous flame/anger outburst
