Hi,

i can start the kernel configuration menu, there are no conflicts, i save the configuration and after a view seconds the pc freeze

Mounting root from ufs:/dev/md0c

this is the last line, which is printed, sysinstall don't starts.

the detection of the DVD device takes also some time.

On another pc there is no problem – can you help me?

I have a Centrino Notebook, 1,7 GHz, 80GB HDD, 512 MB RAM

Christian
