Hi!

I've started a document about performance tuning some time ago and as of now it is in a state where others could benefit from it/contribute to it. I've put all documents on <http://home.raisdorf.net/public/networkperf/> <http://home.raisdorf.net/public/networkperf/article.html> contains the complete article rendered as (ah, you already guessed that :) HTML. Since this is my first FreeBSD article there might be some formatting errors beside the comments in the source where more work has to be done.

Feel free to use it/contribute to it/send patches or flames, ...

Hendrik

P.S. Follow-Up to [freebsd-doc@ set](mailto:freebsd-doc@set).
