To: Jamie <jamie@gnulife.org>

Try installing (if you haven't already) the compatibility libs...

I've seen that error before, and after installing them, the error goes away.

Just a suggestion, not sure if it will actually work.

Peter

I worry about my child and the Internet all the time, even though she's too young to have logged on yet. Here's what I worry about. I worry that 10 or 15 years from now, she will come to me and say "Daddy, where were you when they took freedom of the press away from the Internet?"
-- Mike Godwin

Unix IS user friendly... It's just selective about who its friends are.
System Administration – It's a dirty job, but somebody said I had to do it.
