OK, sorry to deluge the list with questions, but now I've having serious problems compiling ports.

Xfd won't compile:

====> Building for Xft-2.1.2

gmake all-am

gmake[1]: Entering directory `/usr/ports/x11-fonts/Xft/work/xft-2.1.2'

source='xftdpy.c' object='xftdpy.lo' libtool=yes \

[...snip...]

xftdpy.c: In function `XftDefaultSubstitute':

xftdpy.c:484: `FC_RGBA_UNKNOWN' undeclared (first use in this function)

xftdpy.c:484: (Each undeclared identifier is reported only once

xftdpy.c:484: for each function it appears in.)

gmake[1]: *** [xftdpy.lo] Error 1

gmake[1]: Leaving directory `/usr/ports/x11-fonts/Xft/work/xft-2.1.2'

gmake: *** [all] Error 2

*** Error code 2

Stop in /usr/ports/x11-fonts/Xft.

*** Error code 1

Stop in /usr/ports/www/mozilla-firebird.

Xscreensaver won't compile:

====> Building for xscreensaver-4.10

[...snip...]

./demo-Gtk.c:74: gtk/gtk.h: No such file or directory

./demo-Gtk.c:81: gdk/gdkx.h: No such file or directory

In file included from ./demo-Gtk.c:113:

demo-Gtk-support.h:9: gtk/gtk.h: No such file or directory

In file included from ./demo-Gtk.c:112:

demo-Gtk-widgets.h:5: syntax error before `*'

[...snip...]

gmake[1]: *** [demo-Gtk.o] Error 1

freebsd-questions: Compiling ports

```
gmake[1]: Leaving directory
`/usr/ports/x11/xscreensaver/work/xscreensaver-4.10/driver'
gmake: *** [all] Error 5
*** Error code 2
```

Stop in /usr/ports/x11/xscreensaver.

I ran `make install` on both of those cases. I then wanted to use portupgrade, which installs:

```
# uname -a
FreeBSD 68.162.128.185 4.7-RELEASE FreeBSD 4.7-RELEASE #1: Sat Nov 16
20:36:05 EST 2002 root@proteus.res.cmu.edu:/usr/src/sys/compile/adam
i386# pkg_info | grep portupgrade
portupgrade-20030723 FreeBSD ports/packages administration and management
tools
```

but isn't found:

```
# portupgrade
su: portupgrade: command not found
```

I'm about ready to pull my hair out. Any help is greatly appreciated.

Adam
