On my mail machine I have sendmail.cf point to this file.

relay-access.cw

inside it it has entries like so:

```
2*1.11*.1*5.2 550 We don't accept mail from spammers
6*.167.174 RELAY
1.1.1.1 RELAY
```

after i added my NEW entry i run this

```
cd /etc
makemap hash /etc/relay-access < relay-access.cw
```

and i always kill -HUP pid\_of\_sendmail

m
