To: FreeBSD Mailing List <[freebsd-questions@FreeBSD.ORG](mailto:freebsd-questions@FreeBSD.ORG)>

I've got Gnome set up as my default GUI on my new DNS server. (Seems much improved over the older RH8 version.) But how do I paste things? Clicking with first/third mouse buttons designate the string or area I want; it should be in the buffer. But the middle button (oR first&third) buttons don't paste.

The right mouse button pops up small rectange with a "Paste" area, but this doesn't work.

Thanks for some clues!

gary
