Robert Uzzi schrieb:

I am seeing two different but related errors and I'm trying to figure out how to fix them. At bootup:

```
/libexec/ld-elf.so.1: Shared object "libmysqlclient.so.15" not found,
required by "pure-ftpd"
```

and while running:

```
Feb 27 18:06:28 www postfix/smtpd[874]: unable to dlopen /usr/local/lib/s
asl2/libsql.so: Shared object "libmysqlclient.so.15" not found, required
by "libsql.so"
```

I checked the obvious

```
ls -l /usr/local/lib/mysql/libmysqlclient.so.15 -rwxr-xr-x 1 root wheel 417578 Feb 27 17:37
/usr/local/lib/mysql/libmysqlclient.so.15
```

```
ls -l /usr/local/lib/sasl2/libsql.so lrwxr-xr-x 1 root wheel 11 Feb 27
17:49 /usr/local/lib/sasl2/libsql.so -> libsql.so.2
```

```
ls -l /usr/local/lib/sasl2/libsql.so.2 -rwxr-xr-x 1 root wheel 20693
Feb 27 17:49 /usr/local/lib/sasl2/libsql.so.2
```

So they exist but I'm at a loss for how to fix this.

Is the missing library shown by "ldconfig -r"? I guess not. Does it work if you run the skript "/usr/local/etc/rc.d/000.mysql-client.sh start" manually?

Björn
