Since it is impossible to use the report generator at the moment, because of error: "There is an error in the configuration of the problem report form generator. Please back up one page and report the problem to the owner of that page. Report 84.158.9.109 is an open proxy server."

Category: misc  
Severity: serious  
Priority: medium  
Class: sw-bug

## Which FreeBSD Release You Are Using:

FreeBSD 5.5-PRERELEASE Environment (output of "uname -a" on the problem machine): FreeBSD hazel.tps 5.5-PRERELEASE  
FreeBSD 5.5-PRERELEASE #58: Sun May 7 13:21:56 CEST 2006  
screen@xxxxxxxxx:/usr/obj/usr/src/sys/HAZEL i386

## Full Description:

```
#make buildworld
```

```
...
```

```
/usr/obj/usr/src/sbin/growfs created for /usr/src/sbin/growfs  
====> sbin/gvinum (obj)  
/usr/obj/usr/src/sbin/gvinum created for /usr/src/sbin/gvinum  
====> sbin/ifconfig (obj)  
/usr/obj/usr/src/sbin/ifconfig created for /usr/src/sbin/ifconfig  
====> sbin/init (obj)  
/usr/obj/usr/src/sbin/init created for /usr/src/sbin/init  
====> sbin/ip6fw (obj)  
/usr/obj/usr/src/sbin/ip6fw created for /usr/src/sbin/ip6fw  
====> sbin/ipf (obj)  
====> sbin/ipf/libipf (obj)  
/usr/obj/usr/src/sbin/ipf/libipf created for  
/usr/src/sbin/ipf/libipf  
====> sbin/ipf/ipf (obj)  
mkdir: /usr/obj/usr/src/sbin/ipf/ipf: File exists  
*** Error code 1
```

```
Stop in /usr/src/sbin/ipf/ipf.
```

```
*** Error code 1
```

## RELENG\_6 does not compile on RELENG\_5

Stop in /usr/src/sbin/ipf.

\*\*\* Error code 1

Stop in /usr/src/sbin.

\*\*\* Error code 1

Stop in /usr/src.

\*\*\* Error code 1

Stop in /usr/src.

\*\*\* Error code 1

Stop in /usr/src.

It does not help to remove the file "ipf", then recreate it as directory: in this case the "Makefile" in "/usr/src/sbin/ipf/ipf" is missing: "I don't know how to make ..."

How to Repeat the Problem:

– check out RELENG\_6:

```
cvsup -g -L 2 -r 2 /etc/sup/hazel-supfile
```

where "/etc/sup/hazel-supfile":

```
# $FreeBSD: hazel-supfile,v 1.19.2.6
```

```
2002/08/06 08:24:46 blackend Exp $
```

```
*default host=cvsup.de.freebsd.org
```

```
#default host=cvsup.freebsd.org
```

```
*default base=/var/db
```

```
*default prefix=/usr
```

```
*default delete use-rel-suffix compress
```

```
src-all release=cvs tag=RELENG_6
```

```
ports-all release=cvs tag=.
```

– run mergemaster

```
mergemaster -p
```

– edit all files which are needed to be changed

```
vipw
```

```
vi /etc/group
```

– change to "/usr/src"

– make buildworld

--

Thomas
