I found that the easiest way to fix this problem is to edit the Makefile. Comment out the following two lines and it should run.

From:

```
.if ${BLACKHOLE} != " && ${BLACKHOLE} != 0
# =====
# net.inet.tcp.blackhole is non-zero. Some http-tests
# will appear to hang and then fail. Do not be alarmed.
# The socket.test would hang, so it is disabled:
${MV} ${WRKSRCH}/tests/socket.test ${WRKSRCH}/tests/socket.test.dis;
# =====
.endif
```

To:

```
#.if ${BLACKHOLE} != " && ${BLACKHOLE} != 0
# =====
# net.inet.tcp.blackhole is non-zero. Some http-tests
# will appear to hang and then fail. Do not be alarmed.
# The socket.test would hang, so it is disabled:
${MV} ${WRKSRCH}/tests/socket.test ${WRKSRCH}/tests/socket.test.dis;
# =====
#.endif
```

Good luck!

Andrew

Re: Cannot upgrade TCL port

Re: Cannot upgrade TCL port

Subject: Cannot upgrade TCL port  
To: freebsd-questions@xxxxxxxxxxxxx  
Message-ID: <44BF225D.1020902@xxxxxxxxxxxxx>  
Content-Type: text/plain; charset=ISO-8859-2; format=flowed

My system is FreeBSD 6.0. After running

```
portupgrade -aP
```

it start upgrading Tcl. After compilation, it starts making tests like the one below. Each test times out after some minutes. It would take a day to run all the tests. Why they are failing? How can I disable the tests? The main problem is that there are other packages depending on TCL, and portupgrade won't upgrade them because TCL fails to upgrade. Please help.

Laszlo

```
fileName.test  
fileSystem.test  
for-old.test  
for.test  
foreach.test  
format.test  
get.test  
history.test  
http.test
```

```
==== http-3.3 http::geturl FAILED  
==== Contents of test case:
```

```
set token [http::geturl $url]  
http::data $token
```

```
----- Test generated error; Return code was: 1  
----- Return code should have been one of: 0 2  
----- errorInfo: couldn't open socket: connection timed out  
while executing  
"http::geturl $url"  
invoked from within  
"set token [http::geturl $url]"  
("uplevel" body line 2)  
invoked from within  
"uplevel 1 $script"  
----- errorCode: NONE  
==== http-3.3 FAILED
```

```
** Command failed [exit code 2]: /usr/bin/script -qa  
/tmp/portupgrade47538.0 env PORT_UPGRADE=yes make PORT_UPGRADE=yes
```

Re: Cannot upgrade TCL port

\*\* Fix the problem and try again.
