Are nic1 and nic2 on the same network?

Are client2 and nic2 on the same network?

Need a bigger picture with some detail.

On 10/23/06, Albert Shih <[shih@xxxxxxxxxxxxxxxx](mailto:shih@xxxxxxxxxxxxxxxx)> wrote:

Hi all

I've two NIC on my server.

Until now I just use one. I want use the second interface to increase perfs.

The server have only one purpose : nfsd.

Suppose if I do

nfs\_nic\_1 <----> client 1

nfs\_nic\_2 <----> client 2

well that's work but not... really because if incomming traffic from client\_2 pass through nic\_2, all output traffic pass through nic\_1.

How can I make the all traffic between client\_2 and my server pass through nic\_2 ?

Regards.
