Hi

if this is a card reader then it will be most of the time something like

```
mount_msdosfs /dev/da0s1 /mnt/usb
```

Now it works well. Thanks for your advice.

Just have a look into /dev

Cheers Oliver

Hi all,

I am newbie to UNIX and using FreeBSD 7.0 current ,and I cannot mount my USB flash disk. I searched on google but couldn't find anything helpful.

I did this steps.

```
#mkdir /mnt/usb
#mount /dev/da0 /mnt/usb
mount: /dev/da0 : Invalid argument
```

```
# mount -t vfat /dev/da0 /mnt/usb
mount: /dev/da0 : Operation not supported by device
```

Now I really don't know what to do? Can anybody advice me what to do?

Thanks,
