I bought the board without looking at the audio parts, because "every" board has a CD in port. Turns out this one doesn't, it uses digital CD Audio and doesn't use the connector anymore ([1]<http://www.intel.com/support/motherboards/desktop/sb/CS-014753.htm>). Are there any options for playing CDs with FBSD on this board? I can rip the disk to MP3, then play that; but are there any ways to just play the disk?

Thanks for any pointers in the right direction,

Joe.

As long as you can rip it to mp3, you should be able to play it with e.g. vlc or any other cd player.
