ls -l /dev/acd0\*

Is the minor mode (right before the month) for all "0"? If not, delete them and use /dev/MAKEDEV to make new ones.

ls -l /dev/acd0\*

crw-r----- 4 root operator 117, 0 Mar 7 15:51 /dev/acd0a

crw-r----- 4 root operator 117, 0 Mar 7 15:51 /dev/acd0c

Minor mode----^

Try to explicitly issue the mount from the root account:

```
# mount -t cd9660 /dev/acdc0 /cdrom
```

What (if any) errors do you get? (This is a ISO9660 CD, isn't it?)
