Yamaha YMF744 sound is "clipped off"

I've discovered that (with 4.9-RELEASE), the `snd_ds1.ko` module is the appropriate one for my Sony VAIO PCG-F480.

However, it seems the sound is "clipped off" at the end... it starts just fine, but then simply stops before it should.

Anyone else seen (well heard) of something like this with 4.9-RELEASE?
