Hello Rob,

I meet the same trouble while compiling system from sources.
It seems you haven't installed crypto sources, by default they absent
in src and need to be installed manually.

I see here 2 ways:

- 1) disable encryption by setting in /etc/make.conf
NO_CRYPT=yes (please, refer to /etc/default/make.conf for
details)
- 2) install crypto sources – you may download from
<ftp://ftp.au.freebsd.org/pub/FreeBSD/releases/i386/5.2.1-RELEASE/crypto/>
for example or another mirror.

Yours, Eugene
