To: [freebsd-stable@freebsd.org](mailto:freebsd-stable@freebsd.org)

CVS is being updated but FreeBSD still uses v1.11.5. I'm trying to use a FreeBSD box as a server for both FreeBSD and Windows CVS clients, and I'm finding a few problems which, I believe, are fixed in CVS versions after 1.11.5. Unless I missed something major, there's not a port for keeping up with CVS either.

Any plans to update CVS in the base system?

This is not a complaint, btw; it's just an attempted optimization of local resources. <grin>

Please Cc me on replies. Thanks much.
