Hi all,

Found this output from df:

```
Filesystem 1K-blocks Used Avail Capacity Mounted on
server:/arch 240382062 227608336 18014398503025146 0% /arch
```

Wish I had that much space available :-)

On the server, the same filesystem looks like:

```
Filesystem 1K-blocks Used Avail Capacity Mounted on
/dev/ad2s1a 240382062 227608336 -6456838 103% /arch
```

Sounds like a signed/unsigned inconsistency to me. Unfortunately, I have no newer -stable to test with at the moment.

Server:

```
FreeBSD server.local 4.7-RELEASE-p26 FreeBSD 4.7-RELEASE-p26 #8: Wed Mar 31
01:52:22 CEST 2004 root@server.local:/usr/obj/usr/src/sys/SERVER47 i386
```

Client:

```
FreeBSD client.local 5.2-CURRENT FreeBSD 5.2-CURRENT #1: Wed Aug 4 18:21:10
CEST 2004 root@client.local:/usr/obj/usr/src/sys/CLIENT5 i386
```

Regards,

Paul Schenkeveld
