Hi,

on my FreeBSD laptop net-snmp-5.2.1 is installed. However, the portupgrade to net-snmp-5.2.1\_1 failed. I tried to build it manually, but make failed, too. Next step, I set the option WITHOUT\_PERL=yes. But I still get this error everytime:

>>>

```
Warning: -L.././snmplib/ changed to
-L/usr/ports/net-mgmt/net-snmp/work/net-snmp-5.2.1/perl/SNMP/../../snmplib/
Unrecognized argument in LIBS ignored: '-rpath=/usr/local/lib'
Writing Makefile for SNMP
/libexec/ld-elf.so.1:
/usr/local/lib/perl5/site_perl/5.8.6/mach/auto/SNMP/SNMP.so: Undefined
symbol "perl_get_sv"
*** Error code 1
```

```
Stop in /usr/ports/net-mgmt/net-snmp/work/net-snmp-5.2.1.
```

```
*** Error code 1
```

```
Stop in /usr/ports/net-mgmt/net-snmp.
```

<<<<

I am using FreeBSD 5.4-PRE and perl 5.8.6.

Could you please give me a hint?

Kind regards

Rainer
