To: freebsd-stable@freebsd.org

Hello,

I'm using apsfiler with FreeBSD stable:

apsfiler-7.2.6 = up-to-date with port

root@kg-work# uname -a

FreeBSD kg-work.kg4.no 5.3-STABLE FreeBSD 5.3-STABLE #1: Sun Nov 14

20:19:11 CET 2004 root@kg-work.kg4.no:/usr/obj/usr/src/sys/SS51G

i386

when my "pdf printer" (pdfwrite) stopped working, I noticed in the printer logfiles (/var/spool/lpd<PRINTERNAME>/log) that I had the same problem as described here:

<http://lists.freebsd.org/mailman/htdig/freebsd-stable/2003-April/000792.html>

I have that message for all defined printers that I use.

Did anybody find a solution to this problem?

--

Regards,  
Torfinn Ingolfson,  
Norway
