This note in the 5-CURRENT UPDATING file (when -CURRENT was 5.x), indicates you'll need to rebuild all 5.x executables made after this change (20041001 entry).

<http://www.freebsd.org/cgi/cvsweb.cgi/src/UPDATING.diff?r1=1.366&r2=1.367&f=h>

```
/lib/libm.so.2 -> libm.so.3
/lib/libreadline.so.4 -> libreadline.so.5
/usr/lib/libhistory.so.4 -> libhistory.so.5
/usr/lib/libopie.so.2 -> libopie.so.3
/usr/lib/libpcap.so.2 -> libpcap.so.3
```

Are you sure that the problem is with libstdc++ and not the above libraries?

Was there any changes to libstdc++ between 5.4 & 5.3?

Scot
