Aha, that explains why it will not work. see this:

[http://linuxprinting.org/show\\_printer.cgi?recnum=Canon-LBP-460](http://linuxprinting.org/show_printer.cgi?recnum=Canon-LBP-460)

the printer can print ascii text at all, it is a raster-only win\* gdi printer. It is the driver who does all the work.

Always, always check LinuxPrinting.org before starting with an unknown printer.
