do you have 'options NETGRAPH' in your kernel? see 'man udbp'.

On Sun, 29 Oct 2006 20:18:50 +0100, Don Wilde <[Don@xxxxxxxxxxxxxxxxxx](mailto:Don@xxxxxxxxxxxxxxxxxx)> wrote:

I did everything I could to clean out /usr/obj, did 'make cleandir', etc, before building, but it appears that the fix (as of yesterday's CVS) for this problem isn't there yet. I remember somebody mentioning about 2 weeks ago that work has been done in -CURRENT on this.

I am running a fairly stock kernel without IPv6 on a Dell Inspiron 6000.

```
make -DALWAYS_CHECK_MAKE buildkernel KERNCONF=LYNX
```

...
