Hi,

Change the threading lib. It fixed it for us.

```
% cat /etc/libmap.conf
[clamd]
libc_r.so.5 libthr.so.2
libc_r.so.6 libthr.so.2
libthr.so.2 libthr.so.2
libpthread.so.1 libthr.so.2
libpthread.so.2 libthr.so.2
```

Even with libthr the CPU usage is still far too high ...
I'm currently looking at the code.

Martin
