Dear all,

i would like to know if HP Q200 FC HBA bus adapter is supported by FreeBSD. It's sold with HP storageworks MSA1000 SAN kit . It could be

Q200?? In general, most of our adapters are OEM-ed from QLogic. Or from Emulex. The Qlogics are generally supported by the isp(4) driver. If this MSA1000 SAN kit was originally sold for Linux deployment you have a Qlogic. A close look at the chip on the adapter will quickly enlighten you.

The last MSA1000 Starter Kit I have seen had QLA2312 included (HP FCA214).

FCA2214 if I am not mistaken.

Yes, typo, need new keyboard at home I think.
