*** Error code 1
```

Stop in /usr/src/usr.bin/kdump.

No changes to this src section for over 2 months:

<http://www.freebsd.org/cgi/cvsweb.cgi/src/usr.bin/kdump/>

I also don't see an ioctl.c there. Maybe you did a make -j2 or something in parallel and the output order isn't correct?

```
$ find /usr/src -name "ioctl.c"
/usr/src/lib/libstand/ioctl.c
/usr/src/sys/dev/hptmv/ioctl.c
```

<http://www.freebsd.org/cgi/cvsweb.cgi/src/lib/libstand/ioctl.c>

Re: buildworld RELENG_6 – Stop in /usr/src/usr.bin/kdump

shows no changes for 5 months, to any branch.

<http://www.freebsd.org/cgi/cvsweb.cgi/src/sys/dev/hptmv/ioctl.c>
shows no changes for 20 months to RELENG_6.

Actually, ioctl.c is generated by mkioctls. Andrew, what do the lines in the generated ioctl.c that generated the warnings look like? Did you clean out /usr/obj before starting the build?

Sean
