According to Theo de Raadth <http://marc.info/?l=openbsd-misc&m=118296441702631> latest Intel Core 2 Duo processors are buggy as hell. What counter-measures are taken within FreeBSD community?

The MMU specification updates described in the documented were easily handled by FreeBSD with tiny code changes. (Fixed 4/21/07 current - 4/25/07 stable)
