Subject: error – snmp\_bridge

During the make buildworld (6stable) i got this:  
Change begemotBridgeBaseName > bridge\_oid.h  
line 31: '(' expected at begin of node  
context: " TruthValue ENUM (  
\*\*\* Error code 1  
Stop in /usr/src/usr.sbin/bsnmpd/modules/snmp\_bridge.

...

any idea?  
tia

You're getting the error most likely because you're updating from a system that has an older version of gensnmptree(1). Compiling and installing gensnmptree(1) before starting buildworld should solve your problem –

```
#cd /usr/src/usr.sbin/bsnmpd/gensnmptree/  
#make && make install
```

cheers,  
Shteryana
