Hello All,

My IA64 machine does not detect the USB keyboard, but it detects USB mouse.

I am trying to install linux in IA64 machine where i got installation screen in the VGA monitor but i was not able to use my USB keyboard but i am able to use USB mouse.

I find same problem in another IA machine too.

I even tried with another keyboard also but find same problem.

Do i need to do anything in the hardware to detect the keyboard.

Thanks and Regards,

Jack
