To: hpux-admin@DutchWorks.nl

Setup - L class with 4 cards.

Assigned a ip to a unused card. It adds route for itself.

How do I control this or this is the default behaviour?

My default route points to firewall. I can not telnet onto new ip because there is no route for new ip on firewall.

I will have to change default route.

But when you do

```
ifconfig lan0 xxx.xx.xx.xxx up mask xxx.xxx.xxx.xxx
it adds route entry for itself.
```

Thanks in advance.
