Hi List !

Please I would want to know if someone has experienced similar problem to this:

I have to install the DBI 1.37 module for Perl, but at the stage when I execute a make test I get the message:

```
.....

```

```
gmake: *** [test_dynamic] Error 2
```

I'm using Perl 5.8, gcc 3.2 and DBI 1.37 , my HP is 11.11.

Please could be someone help me with this? What is wrong? I attempted to search info about this but nothing...

Thank you for your help.

Regards.
