Hello admins,

I've been trying to download version A2.0 of the secure web console firmware from the HP ftp server running on IP:

192.6.165.37

using the following directory path:

/dist/webconsole/A2.0

but I'm not having much luck. I tried several times yesterday both at work and from my home ISP dial up. I've just tried again today at work and still no joy.

I did turn this up in a Google search:

<http://bizforums.itrc.hp.com/cm/QuestionAnswer/1..0x80eb585fae8bd711abdc0090277a778c,00.html>

If you scroll down there is a message dated 1st August 2003 from Cheryl Griffin from HP reporting that the 192.6.165.37 site is experiencing difficulties and that if anyone needs the firmware to email her. Unfortunately I don't have her email address (I tried looking at the Forum user profile for Cheryl).

So my question is does anyone have either the A2.0 firmware they would be willing to email me or, alternatively, the email address for Cheryl Griffin at HP so I can request a copy of the firmware from her?

Many thanks.

Best regards,

HP-UX-Admin: [HPADM] Trying to locate a copy of the Secure Web Console firmware version A2.0

Andy Cranston.
