Hpux-admins:

Can I change the VG names of a VG "on-the-fly", so to speak, without doing an export/import?

If I want to change an LV name I just:

```
umount /fs
cd /dev/vgXX
mv block_old block_new
mv raw_old raw_new
vi /etc/fstab
    change old to new
mount /fs
```

Can I do a similar trick with an entire VG? (I can unmount it.)

Stuart
