Hi Gurus,

I am using Networker 5.5 and RMAN to do database backup. RMAN said the db backup failed and here is the errors that we got. We only encountered this problem after we upgrade the version of our database 8.0.5 to 8.1.7.

Our DBA already logged this case to oracle but oracle point that this should be log to legato in which legato do the same (just like a ping-pong). It's kind a weird that legato will be the culprit as we have other databases running on the same server that and it all successful. Has anyone experience this before or any idea on this?

```
RMAN-00571: =====
RMAN-00569: ===== ERROR MESSAGE STACK FOLLOWS =====
RMAN-00571: =====
RMAN-10038: database session for channel ch1 terminated unexpectedly
RMAN-10035: exception raised in RPC: O
RMAN-10031: ORA-19624 occurred during call to
DBMS_BACKUP_RESTORE.BACKUPPIECECREATE
RMAN-10035: exception raised in RPC: O
RMAN-10031: ORA-19624 occurred during call to
