Hi Gurus,

Would like to confirm if this is the step I need to execute in order to copy all SW(bundles). I have here 2 CDs. My objective here is to consolidate the 3 bundles (2 from CD1 (XSWGR1100 & XSWHWCR1100) and 1 from CD2 (QPK1100)) to a file system.

For CD1, here are the contents:

```
::> ls /cdrom1
```

```
DIAGNOSTICS QPK1100.readme.html XSWGR1100.readme
```

```
XSWHWCR1100.readme.html
```

```
PATCH_TUTORIAL.PDF TEXT_FILES XSWGR1100.readme.html
```

```
catalog
```

```
QPK1100 USRGUIDE.PDF XSWHWCR1100
```

```
lost+found
```

```
QPK1100.readme XSWGR1100 XSWHWCR1100.readme
```

For CD2:

```
::> ls /cdrom2
```

```
DIAGNOSTICS PATCH_TUTORIAL.PDF TEXT_FILES XSWHWCR1100
```

```
HWE1100 QPK1100 USRGUIDE.PDF catalog
```

```
HWE1100.readme QPK1100.readme USRGUIDE.PS lost+found
```

```
HWE1100.readme.html QPK1100.readme.html XSWGR1100
```

Steps:

1. swcopy -s /cdrom1/XSWGR1100 @ /sdux_depot
2. swcopy -s /cdrom1/XSWHWCR1100 @ /sdux_depot
3. swcopy -s /cdrom2/QPK1100 @ /sdux_depot

Question, is the above steps correct? Also, do I need to perform swreg?[Ruby Domalanta] Can somebody help me provide some guidelines on how to achieve this? Thank you so much!

Thanks in advance!

Ruby Domalanta
