To: hpux-admin@DutchWorks.nl

We're upgrading the CPU on our RX2600 running HPUX B.11.22 to a 900 MHZ.

Are there any gotchas that I should be aware of?

I have a new codeword for the new CPU for MirrorDisk/UX, how do I get this installed? Do I have to undo the mirror and re-create it after the CPU upgrade?

Thanks for any tips,  
-Bill
