To: <hpux-admin@dutchworks.nl>

I have two rp5470 servers that I have HPDPS used with a few printers. Any time one of the printers has an issue, such as out of paper or paper jam, etc a message get sent to root. Well this is a pain and I don't really need to know about this. Any one know how to disable these notification? I can't seem to see where to set it not to notify me.

Thanks a bunch,

– Justin
