Thanks Yasuyuki, Anthony & Andrew for your responses –
"tr '\r' '\n' < macfile > unixfile"

>

> *Dear managers,*

>

> *A small question, is there a simple way to convert a text file created on*

a

> *mac to be readable on unix (namely converting CRs to LFs)? Is there*

> *something equivalent to dos2unix? There's something called iconv but I'm*

not

> *sure how to use it in this case. Many thanks in*

> *advance!*
