Thanks for all responses,

I do it this:

Edit the file `/usr/openwin/lib/speckeyd.map`

Just uncomment:

```
#SunPowerSwitch - $OPENWINHOME/bin/sys-suspend  
#SunPowerSwitchShift - $OPENWINHOME/bin/sys-suspend -n
```

kill and restart `speckeyd`.

```
# kill -HUP PID-of-speckeyd
```

Regards,

Pablo Salazar
