SunOS <> 5.8 Generic_117000-03 sun4u sparc SUNW,Ultra-80 Solaris

SunOS <> 5.9 Generic_118558-02 sun4u sparc SUNW,Ultra-60 Solaris

Just a heads up that StarOffice 7.0 patch 116519-07 completely broke my StarOffice. Upon installation of the patch got many complaints about not being able to register components. After installation, upon startup StarOffice complained about missing components. Tried to run `./program/setup` but it complained about missing program files.

Anyone else install this successfully?

Installation entails changing to patch directory and typing:

```
umask 022
./so-7-pp4-02-bin-solsparc.bin -patch <installation-path>
```
