Hi

I am running an application which uses /usr/lib/libthread.so, etc files...

Now I want to use the /usr/lib/lwp/libthread.so , etc files...

I dont want to restart the application... Can i copy the files from
lwp directory
and put those in /usr/lib.
will this cause a problem..

Will the new libraries are updated into memory agian or what will be the
consequencess...

Please help me out in this regard.

Thank you
