Greetings All,

I am getting following error when i do a telnet to a SUN E 450 machine from windows or any HP-UX machine.If I do it from a Solaris machine it's working.To this machine I applied the 9\_Recommended Patch .It was working fine even after applying the patch.I am getting the same error when I do traceroute from this machine to any non Solaris OS.

```
ld.so.1: in.telnetd: fatal: relocation error: file
/usr/lib/nss_dns.so.1: symbol res_gethostbyaddr: referenced symbol not
found
Connection closed by foreign host.
```

uname -a

SunOS xxxxx 5.9 Generic\_118558-16 sun4u sparc SUNW,Ultra-4.

Please advice me on this,how to solve this.

Thanks & Regards

Rajeev Andrews
